ADVERTISEMENT.

The exhibition of industry of all nations, which will be opened at London next mai 1. has engaged also the governments of the states of the great German Commercial-Union, to take all measures necessary to procure to their industriels, those benefits as may be expected from this exhibition.

By this view, and after a resolution has been taken february 6. 1851 at Wiesbaden on the general-conference in concerns of the Zoll-Verein, to publish a catalogue of its exhibitors, in which also the prices of the different articles to be delivered in, may be denoted; the Prussian commission for the London exhibition has received the same consensions from the northern German states not belonging to the Zoll-Verein, and so the following catalogue has been ordered and prepared for the print.

It was the opinion that it would be best to order it after a geographical series, because you may see than easely the particular industry belonging to each country and town. In regard to the numbers of the first column, if several producers or other persons, delivered together similar object, they have received one single number; but if the same exhibitor delivered articles belonging very distinctly to different sections, these objects are denoted under different numbers.

The numbers in the second column are the same as given by the classification into 30 classes or sections published by the Head juries of the United Kingdom, march 1851. However the subdivisions of the thirty sections could not be indicated, because their determination arrived here only after the general catalogue has been almost finished. Next to an alphabetical register of all exhibitors denoted before, follows a similar one for every class or section, to endeavour an easy

glance upon these and upon the branches of industry in which the Zoll-Verein and the northern Germany are dominating.

The third column in the general catalogue, gives the description of the articles exhibited and other remarks as nearly as possible in the exhibitors own terms. The reductions of measures and weights from the Zoll-Verein in English or French ones, and vice versa, may be done by means of the tables pag. 350.

The prices in the last column, if the contrary is not expressly said, are every-where as wholesale-prices to understand, for the exhibitors of the great German Commercial-Union, have been advertised to mark only these prices, from the first hand, and the title of money in which they are given, is denoted on the head of the column. For the reduction of them in English, French, Prussian or southern Germany money see the tables pag. 345.

Any farther particulars concerning the exhibitors of the Zoll-Verein may be had at its office of inquiry, established at London, during the whole season of the exhibition, after a resolution from the general-conference in concerns of the Zoll-Verein; where the foreign and especially the merchant will be informed on prices and on the way to obtain the productions of the Zoll-Verein; where lists of prices, laid down by the exhibitors, will be distributed, and where the German industriels, who are visiting the exhibition, will be directed as well as possible.

There will also be sold this catalogue with prices, at one shilling.

We conclude with the wish that it may prove a proper guide to the visitors of that part of the exhibition, representing the Zoll-Verein and the northern Germany.

Berlin, april 24th 1851.

Counsellor in the Department of Finances.

WEDDING,

Counsellor.

TABLES FOR REDUCING

MONEY, WEIGHTS AND MEASURES.

I.

The fundament of the coining system in the German Zollverein-States was the Mark, appointed, by the coining convention of the German Zollverein-States held July 30, 1838, to contain 233,855 grains, similar in weight, to that used at the time in Prussia and the states of southern Germany.

By this common fundament, the coining system in the various countries was arranged, so that each country had its own currency, either in dollars and groschen, or in guilders and kreuzers: viz:

The fourteen dollar currency, by which the Mark of fine silver was made to contain 14 dollars; the dollar being equal to $1\frac{3}{4}$ guilders;

The $24\frac{1}{2}$ guilders currency, by which the Mark of fine silver was made to contain $24\frac{1}{2}$ guilders, the gulder being equal to $\frac{4}{7}$ of a dollar or $17\frac{1}{6}$ silver groschen.

In consequence of which the prices of the goods in the above catalogue are partly given dollars and silver- or new-groschen, 30 of which go to the dollar, and partly in guilders and kreuzers, 60 of which go to the gulder.

In the reduction-tables, the standard for reducing English money in the pound sterling (6 doll. 20 sgr. or 11 fls. 40 kr.) that for reducing the French money the Franc ($8\frac{1}{12}$ sgr. or 28 kr. 1 deut). The fractions of pence, deuts, centimes and farthings under $\frac{1}{2}$ are entirely left out, those of $\frac{1}{2}$ and above are however reckoned.

II.

The fundamental measure for the Prussian states, appointed 16 May 1816, is the so called Rhenish foot; it contains 139,13 lines of the universally known Paris foot. The Prussian foot has 12 inches, which are again subdivided into 12 lines.

The Prussian or Berlin ell, which is divided into halves, quarters, eighth's and sixteenth's, has $25\frac{1}{2}$ Prussian inches or 2 feet $1\frac{1}{2}$ inches; is equal to 0,80063 Bavarian, 1,16397 Hamburg, 1,14203 Hannoverian, 1,17976 Leipzic and 1,08580 Wirttemberg ells.

The so called Brabant ell most in use in the Zollverein - States, appears usually in two different sizes: viz:

The Frankfort Brabant ell, is equal to 0,83935 Bavarian, 1,04836 Berlin, 1,22027 Hamburg, 1,23683 Leipzic ells, = 0,59154 Paris staves, = 0,69919 French meters, = 0,76474 English yards, rather more, therefore, than $\frac{3}{4}$ of an English yard.

The Brabant ell used in Leipzic, is equal to 0,82297 Bavarian, 1,02798 Berlin or Prussian, 1,19645 Hamburg, 1,17390 Hannoverian, 1,21269 Leipzic, 1,11609 Wirttemberg ells, = 0,68554 French meters, 0,57129 French Aunes, and 0,74981 English yards, and can therefore be also reckoned at $\frac{3}{4}$ of an English yard.

SEALING-WAX FOR PARCELS A HUNDRED-WEIGHT from 2 Lst. 8 s — 4 Lst. 1 s.

Every sort of Sealing-Wax may be manufactured, when ordered, the more or less liquid.

It is requested to send letters and money post-paid.

The referendary of the exhibition of trade in Berlin reports in the following manner of my manufacture in the «Vossische Zeitung» of 18. August 1849:

Among the very few manufactures of Sealing-Wax those of the manufactory of P. GLANZ attracted the attention of every body by their rich colours and fine purple shades, which we have never seen in such a manner on the best **spanish nor english Sealing-Wax**, being therefore without any comparison of all European manufactures. Even products of amateurs, which we have seen in an other metropolis who probably dit not spare any expense, were much inferior to those deep purple shades. The secret therefore lies not in the ingredients but in employing the due proportions of them, and to find that out is the lucky task of every good manufactory. Sealing with **A - D** particularly after having put cautiously some heated Sealing-Wax before the burning one, upon the paper gives indeed beautiful seals. After having used by accident many years the excellent Sealing-Wax of this manufactory we know also, that the common sorts *bind* well, and the *middlefine* do not char in to pieces, neither drop nor smoke.

To those, who would think the prices of the best Sealing-Wax too high, I observe: that until now no manufactory has been able to forward Sealing-Wax, which is equal to mine at the price of 7 s 6 d as for its quality and beauty. Connoisseurs will very soon be persuaded of it and find even the inferior sorts quite excellent.

NOTICE
CONCERNING
THE MONUMENT
OF FREDERIC THE GREAT
AT BERLIN.

Of this sumptuous Monument executed at the command and under the protection of H. M. the King Frederic William III. and H. M. the King Frederic William IV. by the renowned sculptor Rauch is a description in German, English and French languages with 40 illustrations to be published on the day of its development by the Editor of this Catalogue. Two Editions, one in large Quarto and an other very cheap one, are prepared. The drawings, as well of the whole monument, as of the single parts of it, were made, under the special direction and care of the great master, by Burger and Neu, and engraved on wood by Prof. Unzelmann.

Berlin, 1. mai 1851.

AVIS
CONCERNANT
LE MONUMENT
ÉRIGÉ A BERLIN EN L'HONNEUR DE
FRÉDÉRIC LE GRAND.

Une magnifique statue équestre va être élevée à Berlin en l'honneur de Frédéric le Grand. Le jour de l'inauguration de ce monument, exécuté par le célèbre Rauch suivant l'ordre et sous les auspices de LL. MM. le feu roi Frédéric-Guillaume III et le roi actuel Frédéric-Guillaume IV, il en paraîtra, chez l'éditeur du présent catalogue, une exacte description accompagnée de 40 dessins, en deux éditions, une édition de luxe, et une édition à très-bon marché d'une feuille in-8, format grand aigle. Le texte paraîtra en allemand, en français et en anglais. Les dessins, tant de l'ensemble que des diverses parties de ce monument, le plus grandiose des temps modernes, ont été composés, sous la direction de l'illustre maître, par MM. Burger et Neu, et gravés sur bois par M. le professeur Unzelmann.

Berlin, 1^{er} mai 1851.
